

In-Home Supports

Bayley House In-Home Support Services are personalised one to one support provided within your home. We provide care, independence development, assistance with household tasks and outings into the community to ensure that you receive the care and support you need to achieve greater independence and live a full and rich life. We also provide families with the assistance and assurance that their loved ones are well supported.

Your In-Home Support

Bayley House In-Home Support Services are ideal for those who wish to transition to a more independent adult lifestyle. This service will be a great option for many NDIS participants including those who will not qualify for Specialist Disability Accommodation.

Bayley House In-Home Support Services are available to adults with disability across the South Eastern Suburbs of Melbourne.

Our Service

Our step by step process ensures that clients and families are involved at every stage along the way. We provide you with all the information required to decide if this is the service for you.

We offer comprehensive in-home supports from 3 hours to 24 hours care, up to 7 days a week.

Our team will work to assess the care need for you or your loved ones. We will work with you to establish a regular roster of support by individually matching a skilled support worker to meet your specific support needs.

This service can be funded through your NDIS plan. It is best to work closely with your Support Coordinator to ensure you present all the relevant information to the NDIA.

Why Bayley House?

Bayley House has provided a wide range of services for over 70 years including Day Programs, SDA housing, Support Coordination, Community, Leisure and Recreation and Short Term Accommodation (respite).

Our new In-Home Support Service will build on and complement our existing services, providing support and respite to assist families in their caring role.

Our staff will be Bayley House recruited, trained and supervised to continue our tradition of quality support and service to adults with disability in the southern region.

In-Home Support includes:

- Personal care
- Respite care in the home
- Medical escort
- Ongoing rostered care and support
- Therapy support services
- Companionship
